

KEY FEATURES

- Flexible rubber cones are durable for many repeated uses
- Fast and efficient for long runs
- Easy pull-back
- Ultra tough and tear resistant

CALMISSILE™
Line Carriers

Cal Missile duct projectiles are fast and efficient to run pull-lines

Used to pneumatically run pull lines through raceways, the Cal Missile™ duct projectiles are fast and efficient and are easily blown through out-of-round ducts. The Cal Missile features dual fastening rings, one on each end of the projectile, creating versatile mule-tape tie-points.

Cal Am's highly engineered polymer offers elasticity, toughness, and durability. Available with either two or three polyurethane cups, these cups are resistant to solvents, oxygen, ozone, and sunlight and have an outstanding flex-life guaranteed to outlast other line-carriers of their type on the market today.

HOW TO USE

1. Attach mule tape to the front of the Cal Missile at the stainless steel top loop

2. Run the length of the conduit with compressed air to clean out any debris prior to installing cable

1. Attach a cable to the back of the Cal Missile™ at the stainless steel loop

2. Run the length of the conduit with compressed air for fast installation
