

Cal Am's UniSpacer® Blue Duct Spacer is the superior solution for your duct bank projects.

See how they stack up against custom spacers, and discover the features and benefits that make them the leading choice in performance and reliability!

FEATURES	UNISPACER BLUE DUCT SPACERS	CUSTOM DUCT SPACERS
Cost & Availability	✓ Low, consistent price; stocked and ready for any job	High, variable price; long fabrication times
Installation & Equipment	✓ Fast, clean snap-in assembly; no heavy equipment needed	Slow, manual threading; cranes or forklifts required
Design & Flexibility	✓ Easily connect vertically and horizontally to secure multiple conduit sizes; adjust in field with ease	Custom design each time; fixed dimensions; re-fabrication required for changes
Stability & Materials	✓ Wide, self-supporting base; no rebar or tie wire required but rebar holes are built into the bottom of each piece	Thin, plastic sheets that may bend/twist; extra materials often required; unstable during install
Assembly & Logistics	✓ Prefab or on-site assembly; one SKU per size – less product to maintain and store	Prefab only - new SKU each time; bulky assemblies and inefficient transport
Reliability & Support	✓ No delay risk - always in stock; CAD files available for quick design	High risk of fabrication delays; additional manual design time
Safety	✓ Lightweight for safe one-person handling	Often single-use, heavy assemblies increase injury risk
